

GRADE III

ENRICHMENT ACTIVITY THEME : SCIENCE FEST (JULY - 2021)

With a motto of developing scientific skills and to inspire the participants to know how modern world has evolved, a **Science Fest** was organized for the learners of primary wing that simulated the productivity and innovation in the learners.

A workshop was conducted where learners were introduced to various **inventions**, their utility and how these inventions have evolved over the period of time.

Based on this workshop a hands on activity “**Let Us Invent**”(best out of waste) was conducted in order to spark the thinking and creative skills.

Various things were created by the learners of primary wing like a fun game on the concept of lever, bottle water boat, toy car, hydraulic dump truck and balloon powered vehicle out of waste material.

The fest was concluded with a competition on **Journey of an Invention(then to now)** through “**Walking the Ramp**” and presentations through props, charts and models.
